Abstract (en)

[origin: WO2006128598A1] A handling device for handling a motor vehicle rim (11) in an installation for its surface treatment has at least one gripping arm (12) which can be inserted into a hub (26) of the rim (11) and carries at least one pressure element which can be pressed against an inner surface (28) of the hub (26). According to the invention, the at least one pressure element (18) is designed as a cutting edge or as a pointed peg.
