Abstract (en)

[origin: WO2006128577A1] A device for the state-dependent issuing of sequences of sound in a motor vehicle, which is suitable for issuing sequences of sound which are assigned certain vehicle states and can be determined in each case from sound data which is stored in a memory unit arranged in the motor vehicle, is furthermore suitable for direct or indirect coupling to a computing unit which is not assigned permanently to the motor vehicle and the quantity of sequences of sound which can be dispensed can be changed as a function of data which are received by a computing unit of this type.
