Abstract (en)  
[origin: WO2006127819A2] This invention relates to aramid papers, and a process for making such papers, the papers comprising 5 to 65 parts by weight aramid fiber, 30-90 parts by weight aramid fibrils, and 1-20 parts by weight of conductive filler, based on the total weight of the aramid fiber, fibrils, and filler; the papers having an apparent density of not more than 0.43 g/cm<sup>3</sup> and a tensile index not less than 60 Nm/g.
