Abstract (en)

[origin: WO2006120174A1] The invention relates to a method for monitoring control devices, whereby a program flow control (33) for at least one event-synchronous process (31) is implemented into the control device monitoring. The inventive monitoring module is adapted to carry out a control device monitoring. The inventive module is characterized in that a program flow control (33) for at least one event-synchronous process (31) is implemented into the control device monitoring.
