Abstract (en)
[origin: EP1886777A1] An overhead milling machine has bench upper (3) and lower (4) sections sandwiching a fixture flange (23) for a copy sleeve accessory. The lower section can be removed from the upper section. The upper section has a centering socket (25) for presentation of the flange from below. The gap between the upper and lower sections has locks accessible from the outside when the two parts are closed up and requiring no use of tools.
