Abstract (en)
[origin: EP1886967A2] The working platform comprises a chassis upon which is arranged a telescopic support device (3) which is formed by support segments (7,8) which are at least partially nested one inside the other, and at least one adjusting device (25) in the form of a lift cylinder arrangement (26) is associated with a movable support segment. The support device is formed by three support segments, and the adjusting device is associated with the center segment (7).
