Abstract (en)

The invention relates to a cladding and paving tile which is intended to be mounted on the wall or ground in order to give the appearance of natural paving, the surface of the tile comprising the corresponding ornamental pattern (2). The peripheral contour of the inventive tile (1) corresponds to the contour formed by seven identical tiles which each have a regular hexagonal shape and which are disposed in such a way that the six sides of a central piece are positioned adjacent to the six remaining tiles.
