Abstract (en)

[origin: DE102005021805B3] Cosmetic procedure, for body modeling with sun protection, comprises: applying a primary product on skin portions, which are pre-exposed with sun radiation for 2-4 weeks; applying a main product on the skin during the intensive sun exposure; and applying a final product on the skin after the intensive sun exposure, where the primary product comprises a caffeine, alga extract of Gelidium s.p., pineapple fruit extract, radical inhibitor, copper gluconate, silylpropionic acid, sorbitol, arginine-hydrochloric acid, ornithine-hydrochloric acid, tyrosine containing stimulant and water. Cosmetic procedure, for body modeling with sun protection, comprises: applying a primary product once or twice daily on skin portions, which are pre-exposed with sun radiation for 2-4 weeks; applying a main product on the skin during the intensive sun exposure; and applying a final product on the skin after the intensive sun exposure, where the primary product comprises 0.5-3 wt.% of a caffeine, 0.1-2.5 wt.% of an alga extract of Gelidium s.p., 0.05-2 wt.% of a pineapple fruit extract, 0.3-2.5 wt.% of a radical inhibitor, 0.005-0.1 wt.% of a copper gluconate, 0.05-0.5 wt.% of a silylpropionic acid, 0.1-1 wt.% of a sorbitol, arginine-hydrochloric acid, ornithine-hydrochloric acid, tyrosine containing stimulant for melanin synthesis, water, and optionally further auxiliary and additives materials, the main product comprises the components of the primary product, 5-40 wt.% of a mixture of UV-A and UV-B filters in the weight ratio of 30:70 to 70:30 and 0.01-3 wt.% of an encapsulated oil of green coffee beans, the portion of the radical inhibitor of the main product is (30-60 %) smaller than the primary product, and the final product comprises the components of the primary products and 0.5-2.5 wt.% of the portion of the silylpropionic acid with 2-4 partition. An independent claim is included for a set for cosmetic bodies modeling comprising the primary product, the main product and the final product.
