Abstract (en)

[origin: WO2006131637A1] The invention relates to an air filtration device for the vent (E) of a body (K) of a pump used to fit a liquid or semi-liquid product distributor, said device being characterised in that it comprises a filter membrane (1) through which the product may be discharged from the opening. The free edge of the membrane is connected to a support element which is tightly fixed on the opening.
