Abstract (en)

[origin: CA2610372A1] The invention relates to a method for drying water-based coating compounds. The inventive method comprises the following steps: a) providing a water-based coating compound; b) applying the water-based coating compound to at least part of the surface of a casting mold; c) optionally partially or completely rendering the applied water-based coating compound mat, a part of the support liquid of the coating compound passing into the substrate depending on the time elapsed; d) applying a flammable liquid to the likewise matted layer of the water-based coating compound; and e) completely burning off the flammable liquid.
