Abstract (en)
[origin: US2006255057A1] The present invention relates to a dispenser apparatus for holding and retaining a stack of sheets, such as notepapers or index flags, and for individually dispensing the sheets, wherein the sheets are arranged in a Z-fold manner within the stack, comprising a single dispenser platform having clamping means being part of the dispenser platform for as well holding and clamping the stack in the dispenser apparatus. The invention further relates to a cover device having such dispenser apparatus.
