Abstract (en)

[origin: WO2006114184A1] The invention relates to a method for producing a detergent and cleanser dosing unit, comprising the following steps: a) preparing a detergent and cleanser shaped body with at least one cavity and with a web of at least 1 mm surrounding this cavity; b) applying a first water-soluble film to the web surrounding this cavity; c) filling the cavity, and; d) applying a second water-soluble web over the filled recess and sealing the cavity filled in step c). The invention is suited for producing multiphase dosing units having solid and liquid constituents.
