Abstract (en)

[origin: WO2006131605A1] The invention is directed to a method for manufacturing of a house connection module wherein a tube of fixed length with male and female connection ends is manufactured, in the centre of which a hole is formed for a house connection, and a sealing tape is arranged in its own groove at the male end, wherein a groove is formed around the outer peripheral surface of the tube for a back valve at both sides of the centrally located hole, rubber bands are arranged in the grooves, a sealing collar is arranged on the outside of the rubber bands; and the boundary edges of the back valve are marked on the inside of the tube. The invention is also directed to a house-connection module and a method for installation of the house-connection module in a pipeline.
