Abstract (en)
[origin: EP1889990A2] The fitting (10) has two rotating axes (20,21). The former rotating axis is connected with a locking system and an actuating element (40) is supported on the latter rotating axis, and has a power transmission device (50). The former rotating axis and the latter rotating axis are connected. The fitting covers the power transmission device and has a positioning element, which fixes the fitting at a door wing, and the fitting is deviated around the former rotating axis. The positioning element fixes the fitting reversibly at the door wing detachably.
