Abstract (en)
[origin: WO2006123169A1] The present invention concerns a child safety seat (1) for use with a vehicle seat. The child safety seat comprises a child seat body having: a child support portion (2), and a base member (7), a link (11) projecting from the child seat body, and a releasable connector (12) provided on the link for engagement with an anchorage unit associated with the vehicle seat. The link is attached directly to the child seat body by a pivot connection (14) that permits angular movement of the child seat body relative to the link about an axis, a foot prop (24) being provided at the front of the child seat body.
