Abstract (en)

[origin: WO2006117224A1] The invention relates to a device and a method for reducing emissions once the transfer process is completed, comprising the following steps: positioning a large soft packaging (1) above a docking element (12) that can be closed by a flap device (22) fixed thereto, guiding a discharge tube (4) of the soft packaging (1) through a sealing device (18) of the docking element (12) in a release position in such a way that the sealing device (18) touches the outer side of the discharge tube (4), introducing the sealing device (18) in a operating mode within the connecting flange (14), and expanding the sealing device (18) so that the discharge tube (4) lies with its inner side sealingly at the interior walls of the connecting flanges (14).
