Abstract (en)
[origin: WO2006135167A2] An air-conditioner which includes a display for displaying a variety of images and a sound output unit, etc. is disclosed. The air-conditioner includes: a display for displaying operation states of the air-conditioner using an image or message; and a sound output unit for generating different sounds according to content data displayed on the display. Therefore, a display window displays states of the air-conditioner and a variety of images (avatars) and sound thereon, such that a user can visually and audibly recognize operation states of the air-conditioner or other information at the same time.
