Abstract (en)
[origin: EP1734418A1] The timepiece has a dial with hands (7a, 7b) for displaying the hours of several time zones. The zones are distributed on two non-coaxial superimposed annular discs (9, 10), which are arranged beneath the dial. Each disc, carrying different time zones, is divided into twelve sectors corresponding to the zones. The dial has two windows, and each window is located opposite to a segment of a trajectory of the respective discs. Each disc is linked to manual selection units (23, 24) and the hands using a one-way kinematic link.
