Abstract (en)

[origin: EP1892068A2] The device has a processing surface (9), a device for fixing the work piece during the processing, a processing unit (7,8) and a feed station (2). The length and breadth of the processing surface and the device for fixing the work piece are designed in such a way that the respective work piece is positioned selectively in the transport direction transversely or longitudinally depending on the length. An independent claim is also included for a method for processing workpieces.
