Abstract (en)  
Oil scrapers (8) scrape off oil from the crankshaft and/or from the connecting rods (6). An oil pan (7) is arranged below the crankcase to hold the oil scraped off by the oil scrapers. Air/oil separators (9) separate air from the returned oil. Each oil scraper is designed in one piece with its associated air/oil separator and is guided to the oil inlet opening of each air/oil separator. An oil outlet opening is assigned to each air/oil separator so that the oil outlet opening is located above an oil level in the oil pan in each driving state of a motor vehicle.

Abstract (de)  
Eine Brennkraftmaschine (1) mit einem Kurbelgehäuse (2), in dem eine Kurbelwelle (5) drehbar gelagert ist, mit Einrichtungen (8) zum Abstreifen von Öl von der rotierenden Kurbelwelle (5) und mit einer unterhalb des Kurbelgehäuses angeordneten Ölwanne (7) zur Aufnahme des von den Abstreifeinrichtungen (8) abgestreiften Öls.
