Abstract (en)
[origin: EP1892734A1] The arrangement has two contact units and a Velcro connector with an electrically conductive surface, where each contact unit has carrier tapes (1, 2) and Velcro structures (14, 24) with an electrically conductive surface. The Velcro structures of one of the contact units are stuck with other contact unit for forming the Velcro connection. The Velcro structures have flexible fibers made of an electrically insulating material e.g. polymer.
