Abstract (en)  
[origin: WO2006136409A1] A filter cartridge (3) is proposed in which the filter process and in particular properties of the filter cartridge can be controlled by the respective device (2) in which the filter cartridge (3) is used. This object is achieved by a communication element (17) being provided, by means of which cartridge-specific information is accessible to a corresponding external communication element (18).
