Abstract (en)
[origin: WO2006134282A1] The invention concerns a cosmetic, therapeutic, in particular dermatological, bioprecursor of formula [A]_n-PP - [B]_m wherein: PP represents a polyphenol radical where each hydroxyl function is protected by a group A or a group B; A is a saturated or unsaturated, substituted or unsubstituted alkyl chain, comprising 1 to 20 carbon atoms, preferably, 1 to 4, which is bound to the polyphenol by: a carboxylic ester function on one hydroxyl function of said polyphenol; or via an A' spacer, wherein A is bound to A' by a carboxylic ester function, and A' is bound to the polyphenol by a carboxylic ester function on one hydroxyl function of said polyphenol; n represents an integer not less than 1, in particular 1, 2, 3, 4 or 5; B is a precursor of a biologically active molecule, which is bound to the polyphenol by: a carboxylic ester function on one hydroxyl function of said polyphenol; or via a spacer B', wherein B is bound to B' by a carboxylic ester function, and B' is bound by a carboxylic ester function on one hydroxyl function of said polyphenol; m represents an integer not less than 1, in particular 1 or 2.
