Abstract (en)
[origin: WO2006124417A2] A system for arranging a plurality of conductors includes a guide assembly having a plurality of passage guides. Each of the plurality of passage guides are constructed to guide the passage of a conduit through the guide assembly. The guide assembly is securable to a substrate and constructed to organize individual conduits passing therethrough. The individual conduits communicate any one of a fluid, an electrical power, a hydraulic fluid, or the like through the guide assembly.
