Abstract (en)

[origin: WO2006131411A1] The valve (1) according to the invention for controlling an injection valve of an internal combustion engine comprises a valve element (6) which is arranged in a stepped bore (4) of the valve housing (5) with the formation of a high-pressure-side annular space (2) which is sealed with respect to the valve housing (5) by sealing contact of the valve element (6) with a first annular shoulder (8) of the bore (4) and, axially spaced apart therefrom, by a sealing ring (9), the sealing ring (9) being arranged between an annular shoulder (10) of the valve element (6) and a second annular shoulder (12) of the bore (4), in particular being clamped in with prestress.
