Abstract (en)
[origin: WO2006133899A2] The invention relates to a microscope (2), in particular, a fluorescence analysis microscope, with an illumination support (20) and illumination units (22a, 22b) arranged thereon, for the illumination of a sample region (10). According to the invention, a sample region (10) may be evenly illuminated with a compact device in a simple manner, whereby at least three illumination units (22a, 22b) are arranged on the illumination support (20) for the simultaneous illumination of the sample region (10) from different directions.
