Abstract (en)
[origin: EP1894604A2] The protective clothing (10) has an outer covering (12) completely surrounding the person and a gas guiding unit (26), where gas is released into an interior of the outer covering to supply breathing gas to a person. A gas outlet valve is provided in the outer covering and is designed as a pressure limiting valve to adjust an internal pressure of the clothing to a predetermined target pressure during gas supply.
