Abstract (en)
[origin: EP1894680A1] The device has a drive housing connected with a motor housing (10), where the motor housing is formed into two half shells (12), which run in longitudinal direction of the device. The half shells are connected with each other by a clamp (18) running in the longitudinal direction and fixed against each other by the clamp. A handle (30) is provided at a machine housing. The drive housing and the clamp are made of aluminum. The half shells of the motor housing and/or shells of the handle are made of plastic.
