Abstract (en)

[origin: EP1895067A1] The device has operating units protruding forward in starting position opposite to a frame-shaped screen (4) and provided with pressure plates (5.2, 5.1). The plate (5.2) has an operating surface that is smaller than the plate (5.1), where the plates are separated from each other by a joint (F). Each plate laterally protrudes opposite to a lateral surface of its assigned operating unit. The distance of narrow sides (5.11, 5.12) of the respective plates to the lateral surface is larger than the distance of a rear side of the plates to a front side (4.1) of the screen in the starting position.
