Abstract (en)

[origin: EP1895120A1] The housing (1) has an inner space (3), in which a holder (4) is designed at an outer side. The housing has a housing thickness (6) within the range of 0.4 to 1.0 millimeter and the holder is formed by bending a part of the housing. A bending radius (7) lies within the range of 3 to 8 millimeters and the holder has a length (8) of 7 millimeter. The holder is provided at an area of the housing, which is distanced from another area of the housing. Independent claims are also included for the following: (1) an exhaust gas system with an exhaust gas cleaning component (2) a motor vehicle comprises an internal combustion engine and an exhaust gas system.
