Abstract (en)  
[origin: WO2006138399A1] The invention provides methods for treating beta-amyloid protein-involved ocular disease including age-related macular degeneration and glaucoma, pharmaceutical compositions and compounds useful for the same, and the use of these compounds for the manufacture of a medicament for treating the same. More particularly, the invention relates to the use of natural product compounds isolated from Curcuma sp., Zingiber sp., Ginkgo biloba, Salvia sp., a
