Abstract (en)

[origin: WO2006136727A2] The invention concerns a wrist-strap (1), designed to be fixed to a stick for support (2) on the ground, comprising a handle (3), said wrist-strap consisting of a main strap (4) fixed in a fixing point (31) arranged in the upper part (30) of the handle (3). The invention is characterized in that the wrist-strap comprises an additional return strap (5) one end of which is fixed to the main strap (4) and the other is fixed in a linking point (50) arranged beneath the fixing point (31) of the main strap (4) so as to constitute a strap for returning the support stick towards the user's hand when the stick, unsupported on the ground, is not gripped by the user's hand.
