Abstract (en)

[origin: WO2007003328A1] The invention relates to a motor vehicle, particularly an off-road vehicle or a pickup, comprising an underprotection device (2), which has a deflector (16) mounted on the underside of the motor vehicle. In order to create an improved underprotection device, the deflector (16) is mounted on the underside in a manner that enables it to move between a retracted and an extended position.
