Abstract (en)

[origin: WO2006136392A2] Novel polynucleotide and amino acids of Brachyspira pilosicoli are described. These sequences are useful for diagnosis of B. pilosicoli disease in animals and as a therapeutic treatment or prophylactic treatment of B. pilosicoli disease in animals. These sequences may also be useful for diagnostic and therapeutic and/or prophylactic treatment of diseases in animals caused by other Brachyspira species, including B. intermedia, B. alvinipulli, B. aalborgi, B. innocens, B. murdochii, and B. hyodysenteriae.
