Abstract (en)

[origin: WO2007003247A1] The invention relates to a security document or a valuable document, which is equipped with a device for contactless communication with an external read and/or write device and a bi-stable display field (3) that is integrated into the document. According to the invention, the device for contactless communication and the bi-stable display field (3) are produced by a printing method and the bi-stable display field (3) is designed to hold data relating to a person and/or a product.
