Abstract (en)

[origin: WO2007000503A1] An electronic entity comprises an electronic circuit (21) having at least one first terminal (22) and a second terminal (24) to which an antenna is connected. The antenna comprises a conducting element (26) electrically connected to the first terminal (22) of the electronic circuit (21) and comprises a resonator (28) insulated from said conducting element (26) at the antenna, electrically connected to the second terminal (24) of the electronic circuit (21) and coupled to the conducting element (26).
