Abstract (en)

[origin: EP1897458A2] The lock (3) has a component group (1) comprising two fasteners (7, 8) connected with a base. The group has a reset unit (10) and a connector unit (12) connected with the fastener (8) in a form fit manner. The connector unit is attached rotatably against the force of a spring (11) attached to the reset unit. A pivot (13) penetrates into an opening within a flap of a satchel. Another component group (2) receives a switch (15) secured to an opening of the lock, and a holding and switching unit (14) in connection with the connector unit in a locking position of the lock has a cover (16).
