Abstract (en)

The bogie linkage has two railcar bodies (27,28) whose ends rests on the articulated bogie. A flexible coupling is provided for articulated connection of the railcar bodies. The longitudinal link (13) interconnects one of the railcar bodies (28) and a bogie frame. One of the axis of rotation (29) of the supports (15,19) extends in vertical direction extends.

Abstract (de)

Es wird eine Verbindung zwischen einem Drehgestell und einem Wagenkasten vorgeschlagen, die vor allem in vertikaler Richtung sehr platzsparend baut und dadurch den innerhalb des Drehgestells verfügbaren Bauraum vergrößert und/oder eine Absenkung des Bodens eines Wagenkastens (25) ermöglicht.
