Abstract (en)
[origin: EP1898001A2] The bridge section (10), carried by a bridge laying vehicle, gives a choice of laying a long or a short bridge. The base unit (1) has a ramp (2) at each end as a stiff U-profile or closed box carrier with couplings to swing up or down on the bottom chord (1') with a tip (3) to support the ramp unit. When lowered, the ramp forms a continuous road track surface (9) along the bridge.
