Abstract (en)

[origin: EP1898041A1] The fixing device (1) has a clamping element (7), movably connected to a base element (2). There is at least one lever element (5) between the base element and the clamping element. A power element (3) in the form of a turning spindle provides the clamping force for the clamping element, the clamping force being transferred by a transfer element (4, 6).
