Abstract (en)

A turbine blade is provided which comprises a platform section (1) having a first side (11), a second side (13) opposite the first side, and, extending from the first side (11) to the second side (13), a leading side (14), a trailing side (16) and peripheral sides (15) extending along a curved path from the leading side (14) to the trailing side (16). It further comprises an airfoil section (3) extending from the first side (11) of the platform section (1) and a root section (5) extending from the second side (13) of the platform section (1). The root section (5) extends along a path from the leading side (14) to the trailing side (16) of the platform section (1) that is straight or has a curvature which is different to the curvature of said curved path.
