Abstract (en)

The invention relates to a system for registration and payment of parking time comprising at least one organ linked to a parking space for detecting the presence of a vehicle, identification means for a vehicle, and a pay facility for paying for the parking time of the vehicle, which organ for detecting the presence of a vehicle comprises a sensor and a transmitter wherein the identification means comprise a signal emitter installed in the vehicle for identifying that vehicle, wherein the transmitter and the signal emitter are designed to cooperate and the transmitter functions subject to a vehicle present signal from the sensor, and wherein the pay facility comprises a central computer that is coupled with the sensor and that can be coupled via a communication channel with the signal emitter.
