Abstract (en)
[origin: WO2007042868A2] A smoking device is disclosed including an inhalation portion and a combustion portion joined to the inhalation portion. The combustion portion includes a combustible product portion surrounded by a wrapping portion. The combustion portion also includes a colored smoke producing element that produces colored smoke. The color of the smoke produced is communicatively significant, and may correspond to a quality of the smoking device, and/or a characteristic of one smoking the smoking device, and/or an event. A colored smoke module is disclosed that is mountable to at least a portion of a cigarette or other smoking device. The colored smoke module produces colored smoke when burned. Further, the colored smoke module is user mountable to a cigarette or other smoking device.
