Abstract (en)
[origin: WO2007008490A2] The present invention relates to a method of treating patients with solid tumors, leukemias, and other malignancies using a combination of zosuquidar, daunorubicin, and cytarabine. The invention is also directed to pharmaceutical formulations comprising zosuquidar, daunorubicin, and cytarabine. The formulations are particularly effective in treating newly diagnosed Acute Myelogenous Leukemia (AML).
