Abstract (en)  
[origin: WO2007002968A2] The invention relates to an electronic roulette-type betting device (1) comprising a display unit (3) and an associated display control unit (5) for the graphic reproduction of a roulette bowl device (32) together with a rotating ball (36), at least one input unit (4) for inputting symbols on which to bet, a time control unit (6) for setting time limits for the betting process, said limits being reproducible on the display unit (3) as ball rotating limits by means of the display control unit (5), a quota determining module (13) that determines different winning quotas for the individual symbols according to the pre-defined time limits supplied by the time control unit (6), a chance generator (14) for producing and transmitting random variables as winning symbols, and a comparison and evaluation unit (22) for comparing the symbols bet on with winning symbols, and for determining and displaying wins in the event of a correlation of the symbols.
