Abstract (en)
[origin: WO2006122814A1] The invention relates to a shredding device, consisting of at least one shredding roll that is rotatably mounted in a machine frame, at least one shredding instrument that is mounted on said roll, at least one opposing blade that co-operates with the shredding instrument(s) and at least one screen for the shredded product, the housing of said screen at least partially surrounding the shredding roll. The invention is characterised in that the screen can be displaced in relation to the machine frame and/or the shredding roll.
