Abstract (en)

[origin: WO2007006853A1] A method and a shelter arrangement for temporary covering of an open deck space (1) on a watercraft. Said open deck space (1) is provided with a shelter arrangement comprising a flexible protective covering (5), which is tightened in a first direction by means of a plurality of supports (4), which may be gathered side by side for storing and moved in a second direction, principally perpendicular with respect to the supports (4), to be placed at a distance from one another for setting up the shelter arrangement in order to cover said open deck space (1). The ends of the supports (4) are provided with a guiding arm (10), which determines the mutual distance between the supports (4), when the shelter arrangement is in its outspread position, and pushes the supports (4) located ahead of it into the collapsed position of the shelter arrangement, when the shelter arrangement is being packed together.
