Abstract (en)

[origin: DE102005029322A1] The recycling and cooling device is for an internal combustion engine (1). It comprises an exhaust gas return line (8), at least one exhaust gas heat exchanger (11) and an exhaust gas return valve (16). There is also a second exhaust gas heat exchanger (12). The two exhaust gas heat exchangers are combined in a structural unit to form a module (10).
