Abstract (en)
[origin: WO2007000254A1] The invention relates to a device for fixing one or more components (4) to a support part (2) in a distortion-free manner, whereby the edges or surfaces of the component or components (4) have to be fixed in a precisely defined position in relation to the support part (2) or to adjoining components and production and assembly tolerances of the component or components (4) are largely compensated.
