Abstract (en)

[origin: US2008029022A1] This device for automatically pasting sheets of paper or cardboard having a low substance including a storage spool for a backing covered in a film of transfer adhesive, a motor means intended to ensure unwinding of the backing from storage spool and transport of the backing towards a pasting area, an adhesive applicator roll which can move between two positions, an operational position in which the adhesive applicator roll comes into contact with a pressure roll and between which the sheet to be pasted can move and a non-operational position in which the adhesive applicator roll is no longer in contact with the pressure roll or the sheet of paper or cardboard.
